Full-Stack Software Engineer | React, Python, SQL, Javascript, Typescript | Web Applications & APIs

Full-Stack Software Engineer with experience building web applications, APIs, and database integrations that improve performance and user experience. Delivered measurable results including a 20% faster backend response time, 75% faster data delivery through Python API automation, and stronger engagement from new React web functionality at Reaction Data. Combines a strong engineering foundation with prior Agile experience managing sprints, refining requirements, and supporting cross-functional teams to deliver scalable, reliable solutions that meet both user and business needs.

*Software Development | Authentication/Authorization | Performance Monitoring | REST API | Responsive Design
Quality Code | Agile Development | UI Development | Front-End Development | Unit Testing | Debugging & Testing*

PERSONAL PROJECTS

TimeForge – Full-Stack Scheduling Application

Tech Stack: React, TypeScript, Tailwind CSS, Vite (Frontend) | FastAPI, SQLAlchemy, PostgreSQL (Backend) | Netlify & Render (Deployment)

- Built full-stack web app with React, TypeScript, FastAPI, and PostgreSQL featuring JWT authentication, password reset, and intelligent weekly schedule generation based on user availability and activity priorities.
- Architected RESTful API with proper error handling, SQLAlchemy ORM with auto-migration, and secure cross-origin cookie authentication (SameSite=None, HttpOnly).
- Implemented internationalization (i18next), timezone-aware scheduling, responsive dark-themed UI with Tailwind CSS, and optimized cold-start loading for free-tier deployment on Netlify and Render.

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Reaction Data, Orem, UT

08/2024 – 03/2026

- Lead development of React-based web features to streamline navigation and improve UX, resulting in measurable engagement gains including longer session durations and higher click-through rates.
- Optimize SQL query processing and API performance, reducing response times by 20%, maintaining high availability, and ensuring consistent response times for client-facing applications.
- Developed Python-based API that automated client survey contact list delivery, reducing manual analyst workload by 75% and accelerating turnaround times across multiple projects.
- Leverage AWS services and DevOps practices to support deployment pipelines, monitor application health, and ensure reliable infrastructure for production systems.

Business Analyst II | doTERRA, Pleasant Grove, UT

10/2019 – 01/2024

- Partnered with 10 engineers to deliver doTERRA's first mobile application, translating business requirements into technical user stories, prioritizing sprint backlogs, and facilitating Agile workflows that increased team productivity by 80%.
- Supported back-end development to debug and test the application codebase, ensuring database compatibility and improving stability and performance across multiple mobile operating systems.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, HTML5, CSS, React, Typescript, C#, C | **Databases:** SQL, PostgreSQL
Frameworks & Libraries: Node.js | **Technical Tools:** Git, Jira, Figma, Docker, Atlassian | **Methodologies:** Agile/Scrum

EDUCATION

Bachelor of Applied Science in Software Development, Utah Valley University, 2025
